Wireless Innovation Grant

Apply for up to £5,000 to help purchase and install wireless technologies.

Businesses and organisations within the River Severn Catchment and that operate in or aligned to the **water management, agriculture and public sectors** are invited to apply for grant funding to assist them to adopt wireless technologies. The grant will be open to applicants until December 2024.

The grant can **cover 75%** of the total project costs*

Examples of applications that could be supported

- Asset Management
- Remote operations
- Security
- Assessing water levels and quality
- Monitoring weather conditions
- Recording emission rates
- Testing soil conditions
- Recording biodiversity
- Smart metering
- Livestock and crop monitoring

*This can rise to 90% where the applicant is a charity
